

Hans Christian

Ambient Melodic Cello Concert

**2024 Grammy® nominated cellist Hans Christian
takes audiences on a sonic journey**

Hans Christian offers solo concerts where his unmistakable cello playing moves the listener with a haunting beauty. Using the cello in combination with live looping and various ethnic string instruments, he explores a universal musical language that transcends boundaries, cultures, and generations.

During a live looping concert, Hans will record musical phrases that create harmonic and ambient textures in ever changing colors and densities. Audiences will be offered a listening experience that ranges from meditative to passionate, at times with a soaring cello that is supported by a fully orchestrated layer of strings while at other times dissolving into ambient meditative sound paintings.

The artist also incorporates esoteric string instruments, such as the Indian sarangi, to blend with the cello and thereby giving the concert an expanded ethnic flavor. Additionally, audiences may find sound bowls, cymbals, and flutes appear during a concert.

A brief explanation of the techniques used in a concert can be offered afterwards.
